Automated Executive Insights

Auto-generated from filtered data

Overall cancellation rate is **37.0%** across the filtered period, with **44K** cancellations out of **119K** total bookings.

Undefined segment has the highest cancellation rate at **100%**, while **Complementary** shows the best retention at **13.1%**.

Non-Refundable deposits show a **99.4%** cancellation rate — these bookings are administratively canceled but revenue is largely protected.

Portugal (PRT) accounts for **40.7%** of all bookings with a **56.6%** cancellation rate, suggesting domestic bookings need targeted retention strategies.

Peak revenue month was **Aug 2017** generating **₹3.3M** — Jul/Aug 2017 consistently top the charts driven by summer demand.

Online TA drives **47.3%** of all bookings but carries elevated cancellation risk — a key revenue leakage point.

Guests with **0 special requests** cancel at **47.7%** vs only **5%** for guests with 5 requests — high-engagement guests are far more committed.
